MEDSCAN

Smart Medicine Safety & Expiry Management

Scan • Verify • Track • Stay Safe | Flutter • Firebase • OCR • Mobile Application

PROBLEM

Difficulty identifying expiry dates on medicine packaging.

Medicines stored for long periods with forgotten ownership or purpose. Medicine information may be inaccessible due to language barriers. Safety risks when expiry is unknown or unverifiable.

MedScan

MedScan

SOLUTION

MedScan is a smart medicine-management app that uses OCR scanning to identify medicines, track expiry dates, and provide critical safety information — all in one place, for the whole family.

SOLUTIONS

Scan medicine packaging using OCR to instantly identify medicine name, batch number, and expiry date. Flags expired, soon-to-expire, unknown, and unverified medicines — keeping your household safe.

Access detailed medicine information including uses, dosage instructions, side effects, and safety warnings. A safety-first verification principle ensures every medicine is accounted for and trustworthy.

Manage medicines for the entire family under one account. Multilingual support removes language barriers, making medicine safety accessible to everyone regardless of their preferred language.

KEY FEATURES

Medicine Scanner

Smart Expiry Detection

Medicine Information
